20 YEARS AFTER NIRVANA'S NEVERMIND,
DOES SEATTLE STILL ROCK?

QUESTIONS?

I was living in Seattle for four years. When I was walking along the street, I was always amazed by how well the street musicians performed, and their passion for music. This rainy city was the center where alternative rock and subculture emerged during the mid-1980s. Indie rock was commercially successful in the early-mid 1990s in Seattle, due to releases such as Nirvana's Nevermind, Pearl Jam's Ten, Soundgarden's Superunknown, Alice in Chains' Dirt and Stone Temple Pilots' Core.

I AM WONDERING IF SEATTLE PEOPLE STILL EMBRACE INDIE ROCK IN THE RECENT YEARS?

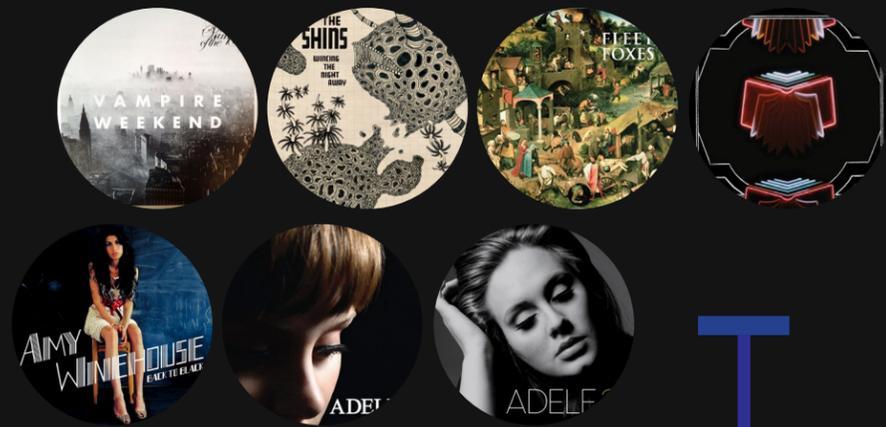

ARE THEY STILL ENTHUSIASTIC ABOUT LISTENING TO INDIE ROCK? OR ARE THEY INTERESTED IN OTHER PARTICULAR KIND OF MUSIC?

ASSUMPTION

INDIE MUSIC IS POPULAR IN SEATTLE. CDS OF INDIE MUSIC MIGHT HAVE AN OUTSTANDING CHECKOUT NUMBERS COMPARE TO OTHER CDS.

I CHOOSE CD AS THE MAIN MEDIA TO EXAMINE IN SEATTLE PUBLIC LIBRARY (SPL) DATABASE.

ANALYSIS I

It can be seen from the result, in the top 10 counts of checkout albums, there are 7 music CDs. They are back to black, Vampire Weekend, Fleet Foxes, Wincing the night away, 19, 21 and Neon bible. It is noticeable that 4 out those 8 CDs are **INDIE ROCK ALBUMS** while the rest of the CDs are **SOUL** albums. This interesting outcome proves my assumption that indie rock still play a significant role in Seattle's music culture.

ANALYSIS II

In the top 8 popular music CDs, there are 4 CDs are indie rock and 3 CDs are soul. It is interesting to do a comparison of checkout times between the music albums in those two categories from 2015 to 2017.

Comparison between Result I & Result II

In 2016, there's a boost in soul album check out. From 2015 to 2017, the checkout times of indie rock decreased gradually and this is reflected in all four indie rock albums. Neon bible have a slight rise in 2016 but drop afterwards.

RESULT I & II

ANALYSIS III

I expand the duration to **2008 to 2017** in order to see more details, while narrow down the CD options to be more specific.

From the last comparison, it is noticeable that different albums in the same category share similar path of decreasing and increasing. So I choose **'back to black'** as the representation for soul album, while **'Vampire Weekend'** as the example for indie album.

As we can see from the Graph, in **2008 indie album 'Vampire Weekend'** reach a peak. The reason I guess is 2008 is the releasing year of this album and people were curious to enjoy the music. Although the checkout numbers decreased slowly in the early 2009, **it increased rapidly on december 2009**. The reason could be the high reputation on this album while it is also featured in a TV show from 2008-2010.

In 2008, **'back to black' check out numbers increased fast** because it is very popular at that time. The album is released in 2007 and won best pop vocal album in 50th Grammy. It was nominated for the 'Album of the Year' in Grammy as well which happened in 2008 February. That explains why 'back to black' catch Seattle people's attention at that time. It is also noticeable that the **checkout numbers increased in 2011** after it's drop in 2010. One explanation is the artist of this album, Amy Winehouse suicide in 2011 and this drove people to revisit this album.

CONCLUSION

I found it will be interesting to compare the check out counts of two soul albums with two indie rock albums, which are 'back to black', '19', 'vampire weekend' and 'fleetfoxes'. Examining the pattern of change of those four albums from 2008 - 2016 brings up analysis of correlation between soul album and indie rock, and push and pull between culture events and album checkout numbers.
